```

Pred. No. is the number of results predicted by chance to have a

score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

NOTE: This is a 'working draft' sequence. It currently consists of 4 contigs. The true order of the pieces is not known and their order in this sequence record is arbitrary. Gaps between the contigs are represented as runs of N, but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence as soon as it is available and the accession number will be preserved.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            69.8%; Score 821.4; DB 2; Length 200346; 95.9%; Pred. New mammalian histamine H4 receptor proteins and polynucleotides encoding the proteins, useful in gene therapy for treating diseases where it is beneficial to elevate mammalian histamine H4 receptor activity.

Claim 4; Fig 5A; 92pp; English.

The present sequence is that of a cDNA clone encoding a murine histamine receptor of the H4 subtype. The CDNA was isolated from a mouse spleen cDNA library. It shows 72.8% homology to the human H4 receptor coding region. The invention provides mammalian (human, mouse, rat and ginnea pig) histamine H4 receptor nucleic acid molecules (see AAI70980-83) and polypeptides (see AAM50564-67). The nucleic acids have been expressed in recombinant host calls that produce active recombinant protein. The pharmacology of known histamine ligands is demonstrated. Mammalian histamine H4 receptor may be used in gene therapy for the treatment of

diseases where it is beneficial to elevate mammalian histamine H4 receptor activity. Recombinant protein is useful for identifying modulators of the mammalian histamine H4 receptor. Such modulators may be useful for diagnosing, treating or preventing asthma, allergy, inflammation, cardiovascular and ecrebroviscular disorders, non-insulin dependent diabetes mellitus, hyperglycemia, constipation, arrhythmia, disorders of the neuroendocrine system, stress and spasticity

The present sequence is that of a cDNA clone encoding a rat histamine receptor of the H4 subtype. The CDNA was isolated from a rat spleen cDNA library. It shows 72.5% homology to the human H4 receptor coding region. The invention provides mammalian (human, mouse, rat and guinea pig) histamine H4 receptor mucleic acid molecules (see AAM170880-83) and polypeptides (see AAM5054-67). The nucleic acids have been expressed in recombinant host cells that produce active recombinant protein. The pharmacology of known histamine ligands is demonstrated. Mammalian histamine H4 receptor may be used in gene therapy for the treatment of diseases where it is beneficial to elevate mammalian histamine H4 receptor activity. Recombinant protein is useful for identifying modulators of the mammalian histamine H4 receptor. Such modulators may be useful for diagnosing, treating or preventing asthma, allergy, inflammation, cardiovascular and cerebrovascular disorders, non-insulin 901 AGGAAGCTAGCCAGGTCACTGGCCATCCTTCTGAGCGCTTTTGCCATTTGCTGGGCTCCA 961 TACTGTCTGTCACAATTGTCCTTTCAACTTACCCCAGAACGGGAACGCCCCAAATCGGTG 1021 IGGTACAGCATTGGCCTTCTGGCTGCAATGGTTCAATTCGTTTAATCCCTTTCTGTAC CCTTTGTGTCACAGGCGTTTCCAGAAGGCTTTCTGGGAAGATACTTTGTGTGACAAAGCAA TGGTACAGCATTGCCTTCTGGCTGCAATGGTTCAATTCGTTTGTTAATCCCTTTCTGTAC New mammalian histamine H4 receptor proteins and polynucleotides ence the proteins, useful in gene therapy for treating diseases where it beneficial to elevate mammalian histamine H4 receptor activity.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             2;
                                                                                                                                                                                                                                                                                                              The present invention describes transmembrane receptors, preferably human grotein coupled receptors (GPCR), for which the endogenous ligand is unknown (orphan GPCR receptors). More specifically the present invention relates to non-endogenous, constitutively activated versions of a human GPCR. These non-endogenous human GPCRs can be useful for the direct identification of candidate compounds as receptors agonists, inverse agonists or partial agonists for use as pharmaceutical agents. AAA46017 to AAA46126 and AAB02825 to AAB02859 represent sequences used in the exemplification of the present invention
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          180
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            180
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            480
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      120
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             240
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   300
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   300

The present sequence is a cDNA encoding hRUP7, an endogenous human orphan by Protein-coupled receptor (GPCR). The full length hRUP7 cDNA was cloned by RT-PCR using human peripheral leucocyte cDNA as template. The orphan GPCR of the invention, like all GPCRs has seven transmembrane alpha helices with an extracellular N-terminus and an intracellular C-terminus. However, no endogenous ligands has yet been identified for the proteins of the invention. The orphan GPCRs may be used in the identification of antagonists for use as pharmaceutical agents. The proteins may also be used in the study of GPCR-mediated signaling cascades, and to elucidate their precise role in normal and diseased human conditions. Nucleic acid expression analysis to provide information about their function in healthy and pathological states
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   2
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           360

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          This cDNA of NCIMB 41073 encodes a human G-protein coupled receptor (GPCR) like polypeptide, designated PPI-013. The PFI-013 protein can be expressed by standard recombinant methodology. Antibodies and modulators of PFI-013 are useful in the maunfacture of a medicament for treating allergic disorder, including extrinsic asthma, immunological disorders, such as intrinsic asthma, vasculitic granulomatous disease, interstitial and other pulmonary disease, including chronic obstructive pulmonary disease (COPD), infectious, inflammatory disease, such as inflammatory bowel disease and neoplastic and myeloproliferative diseases. They are also useful for treating obesity, diabetes, metabolic, neurological medicine, inflammation, cancer, tissue repair, dermatology, photoagaing, skin pigmentation, cancer, tissue repair, darmatology, photoagaing, skin pigmentation, cancer, tissue repair, gastrointestian
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     diseases, allergy and respiratory disease, sensory organ disorders, sleep disorders and hair loss. The PFI-013 protein and nucleic acid are useful in the diagnosis and treatment of the above conditions and also for screening drug candidates for the treatment of diseases associated with signal transduction. The antibodies are also useful for enrichment of eosinophils from mammalian, especially human blood and for detecting the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       120
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 180
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      240

pectoris; myocardial infarction; stroke; ulcers; migraine; voniting; psychotic and neurological disorders such as anxiety, schizophrenia, manic depression, delirium, dementia, and severe mental retardation, and dyskinesias, such as Parkinson's disease, Huntington's disease or Gilles de la Tourette's syndrome. MXR35 proteins and nucleotides are useful as vaccines, and AXOR35 proteins, nucleotides and antibodies may be used in screening compounds for their ability to modulate AXOR35 activity or expression. Such AXOR35 modulators are particularly useful for treating asthma, and inhibiting or promoting the function of lymphocytes, macrophages, eosinophils or neutrophils in asthmatic lung. AXOR35 proteins, nucleotides and antibodies are also useful for diagnosting or determining susceptibility of an individual to a disease via the detection of abnormal levels of protein or mRNA, or via the detection of mutations in the corresponding gene. AXOR35 proteins are The invention relates to the human G protein-coupled receptor AXOR35 (AAB73621), to CDNA encoding AXOR35 (AAB74006), and to AXOR35 fragments and variants. Like all G protein-coupled receptors, AXOR35 has 7 putative transmembrane domains and is involved in signal transduction. AXOR35 has homology and structural similarity with G protein-coupled receptors such as the human histamine H3 receptor. The invention also relates to expression vectors and host cells comprising AXOR35 DNA, to recombinant expression of AXOR35, and to an AXOR35-specific antibody. AXOR35 proteins and nucleotides may be used to treat a wide variety of disorders and nucleotides may be used to treat a wide variety of disorders including bacterial, fungal, protozoal and viral infections, particularly HIV-1 or HIV-2 infections; pain; cancers; benign prostatic hypertrophy; diabetes; obesity; anorexia, bulimia, osteoporosis; asthma, allergies; urinary retention; acute heart failure; hypotension; hypertension; angina

also useful for inducing an immunological response in a mammal against the above diseases, and for antibody production. AXOR35 nuclectides are also useful as diagnostic reagents, in chromosome localisation and tissue expression studies, and for producing transgenic animals useful in drug discovery. AXOR35-specific antibodies are useful for purifying the AXOR35 protein or fragments thereof, and are also useful for trating conditions associated with the expression of the AXOR35 protein. The gene is used for recombinant production of HR and for preparing antibodies (Ab). These Ab are used to purify HR by immunoaffinity chromatography, in immunoassay of histamine receptor, to identify CDNA clones that express the receptor, as antagonist to block binding of histamine (for treating any histamine-associated disorder) and to generate anti-idiotypic antibodies. Agonists and antagonists of the HR protein can be used in the treatment of e.g. inflammation, asthma, allergy, atopic dermatitis, stroke, wyocardial infarction, migraine, chronic obstructive pulmonary disease, rheumatoid arthritis, multiple sclerosis, inflammatory bowel disease and psoriasis
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      GTGCTGGCCTTCTTAGTGAATGGCCCAATGATTCTAGTTTCAGAGTCTTGGAAGGA----

The present sequence encodes a human histamine receptor. The polypeptide is useful for identifying an agonist or antagonist of a mammalian histamine receptor: It is useful as an antigen to elicit the production of antibodies. The histamine receptor polypeptide and polynucleotide are useful in the treatment and management of disease such as inflammation, asthma, allergy, atopic dermatitis, stroke, myocardial infection, migraine, chronic obstructive pulmonary disease (COPD). Theurathitis, multiple solerosis, inflammatory bowel disease and psoriasis. They are also useful for modulating intracellular second messenger pathway activated through histamine receptors (cyclic-AMP, calcium, incsitol phosphate and mitogen activated protein (MAP) kinase), changes in cellular growth rate, secretion of hormones, receptor-stimulated Ca2+mobilization, mitogenic effects, etc
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              CCTGGATTGAAGGAATCAGCTGCATCTCGTCACTCAGAAAGTCCTCGAAGAAGAGCAGC 780

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   The present sequence is that of cDNA clone pH4R encoding a human histamine receptor of the H4 subtype. The cDNA was isolated from a bone marrow cDNA library. The invention provides mammalian (human, mouse, rat and guinea pig) histamine H4 receptor nucleic acid molecules (see

 AAI70980-83) and polypeptides (see AAM50564-67). The nucleic acids have been expressed in recombinant host cells that produce active recombinant protein. The pharmacology of known histamine ligands is demonstrated. Mammalian histamine H4 receptor may be used in gene therapy for the treatment of diseases where it is beneficial to elevate mammalian histamine H4 receptor activity. Recombinant protein is useful for identifying modulators of the human histamine H4 receptor. Such modulators may be useful for diagnosing, treating or preventing asthma, allergy, inflammation, cardiovascular and cerebrovascular disorders, noninsulin dependent diabetes mellitus, hyperglycemia, constipation,

The invention relates to an isolated G-protein coupled receptor

C polypeptide, AXOR35, (and its homologues and variants) and its encoding

C polymolectide (and its homologues, variants, complements and RNA

C equivalents). Also included are an anti-AXOR35 antibody, an AXOR35

C equivalents). Also included are an anti-AXOR35 antibody, an AXOR35

C expression vector, producing a recombinant host cell by introducing the

Vector into a cell such that the host cell produces AXOR35, a membrane of

C the host cell expressing AXOR35, identifying/ Screening for agonists or

antagonists of AXOR35 and inhibiting or promoting the function of

C lymphocytes, macrophages, eosinophils, or neutrophils in diseased tissue,

C administering to the patient AXOR35 agonists or antagonists. The

agonist or antagonist identified is useful for treating a disease such as

C asthma, or for inhibiting or promoting the function of lymphocytes,

C asthma, or for inhibiting or promoting the function of lymphocytes,

C asthmatic lung. AXOR35 or polymucleotide is useful in diagnostic assays,

C or identifying compounds that are agonists or antagonists of AXOR35, as

C vaccines, or for treating infections (Bacterial, fungal, protozoan or

C vaccines, or for treating infections (Bacterial, fungal, protozoan or

C viral infections), transplant rejection, gastrointestinal disorders (such

as gastric ulcer), inflammatory bowel diseases (such as cropic

c irritable bowel syndrome, voniting, inflammation as theumatoid arthritis,

c paciasis), urological diseases (such as rheumatoid arthritis,

c pardiovascular diseases (such as uninary retention),

c ardiovascular diseases (such as uninary retention),

c hypertension, pulmonary disorders (such as treaming),

c hypertension, pulmonary alsoraers (such as renal isoraeries)
